

Step Fluid

Automatic frontal bracket system

 650 ÷ 1600 mm

 Max 250 kg

Step Fluid

Step, developed as an improvement of the Classic bracket, is an easy-to-assemble sliding system with bracket characterized by an automatic frontal coupling. Dedicated for wooden doors, it's also suitable to frameless glass door systems.

Step bracket can be partially recessed into the door, in order to reduce the gap between door and track. Step is available with the new Fluid soft closing dampers, in order to achieve an optimal braking motion and a noiseless sliding quality for doors of all sizes. Maximum load capacity up to 250 kg.
